Chip and Eric:

Our field crew completed sampling for ammocoetes in the study area today, and will be mobilizing to the coast range tomorrow. It is my understanding that Joe Goulet was able to provide suggestions to our team re locations to resample in the study area, and our team successfully electro-shocked 4 locations using the modified technique (4 shocks at each drop).

As soon as I get an updated table with the results of today's sampling I will pass it on to you. Thanks, Jim.
